Responsibilities: Worked as a community volunteer in the warehouse to sort medical products and equipment ready to be transported to different countries that needed medial support.

07/2022 – 08/2022

PROJECTS

Electronic Poultry Management System

Web-based Poultry Farm Management Using Django

electronic Poultry Management System – Developed a web-based poultry farm management system using Django, Python, DRF, and ORM for backend, with HTML, CSS, and JavaScript frontend. Automated inventory tracking, feeding schedules, and health monitoring with RESTful APIs to streamline farm operations.

2024

Web-Based Student Lab Manual

2023

Online Platform for Managing and Accessing Lab Manuals

Developed a web-based Student Lab Manual system using Django, Python, and Django REST Framework (DRF) for backend management, with HTML, CSS, and JavaScript for a responsive frontend. The platform allows students to access lab manuals, submit lab reports, and track their lab activities online. Integrated ORM for efficient database handling and implemented RESTful APIs for secure data interactions.

SKILLS

Programming Languages

Python, Java, JavaScript,

Web Technologies

HTML, CSS, WordPress
